

## features

## ConferenceAnytime™ PrivacyPIN™

ConferencePlus™ PrivacyPIN™ offers an additional level of privacy to ConferenceAnytime meetings. The PrivacyPin option can be selected either at the time of account creation or when setting up new ConferencAnytime subscriptions.

When selected, the host will be prompted to enter a 4 to 9 digit PrivacyPIN code of their choice, or the host may cancel the PrivacyPIN requirement for a particular conference. Once entered, the Privacy PIN will be established for that conference and will be required from all conference participants (in addition to the conference passcode), to provide an additional level of security for the meeting. The host is responsible for providing the PrivacyPIN to invitees in advance of the call.

PrivacyPIN is extremely valuable in those instances when back-to-back ConferenceAnytime calls occur and the host requires assurance that participants are not “crossing over” into the wrong conference. Or, for those ConferenceAnytime customers who have a widely distributed conference passcode, PivacyPIN will ensure that the desired participants are joining the correct conference.

## simplify

ConferencePlus believes that conferencing should not only change the way you do business – it should improve your business processes by increasing productivity and simplifying your business day. We are dedicated to making you and your organization look good by providing audio, web and video conferencing services that help you maximize every meeting opportunity – anywhere, at any time. Our goal is to ensure that each event is a productive, positive, “no surprises” experience.
